Notes

Product Overview

There is no better way to protect and beautify your property than with Sunscape Select window films. This high performance window product line is designed specifically to address and reduce interior reflection, ensuring your filmed windows are as appealing in the day as they are at night. Some Sunscape Select films in the lineup have been designed to provide dual performance properties of solar and safety.

Available in a variety of styles and shades – from cool stone grays to rich golden browns – the entire Sunscape Select lineup greatly increases privacy and reduces glare. This rugged poly film also helps to bind dangerous glass shards together should the window suffer an impact.
